Compare the Winkel Bale Loading Prices for Economics

Bale spike option is available for new Winkel and previous flatbed models.

- Spring loaded bale spike locks
- 4" x 8" cylinder
- Solid steel 2" x 40" spike teeth pointed for easy penetration

- 12 Volt electric hydraulic power unit
- Remote control operation from the cab
- Bale spikes neatly store flush and concealed in rear of bed

Spring Loaded Spike Locks
Optional with bale spike addition.

Optional Mounting Spacer Blocks

Bolted to the truck frame, then welded to the truck bed for a maximum, secure fit. This feature also allows you to easily remove your Winkel Flatbed should you decide to sell or trade your truck.

Winkel will mount your flatbed or you can easily mount your own!

It's what you can't see that makes the Winkel Flatbed the FIRST CHOICE!

In-Cab Remote Control
For inside or outside operation of bale load/unload.

Dual Tool Boxes

Optional 15" x 24" for one half or three quarter ton trucks and large 15" x 30" for ton trucks, both offer security locks. Also conceals hydraulic 12V electric power unit.

Our standard construction includes 2" channel cross members spaced on approximate 12" centers (closer centers available).
